WATER LEAKAGE

TIS
CONTROL EVERYTHING

ALWAYS SAFE.

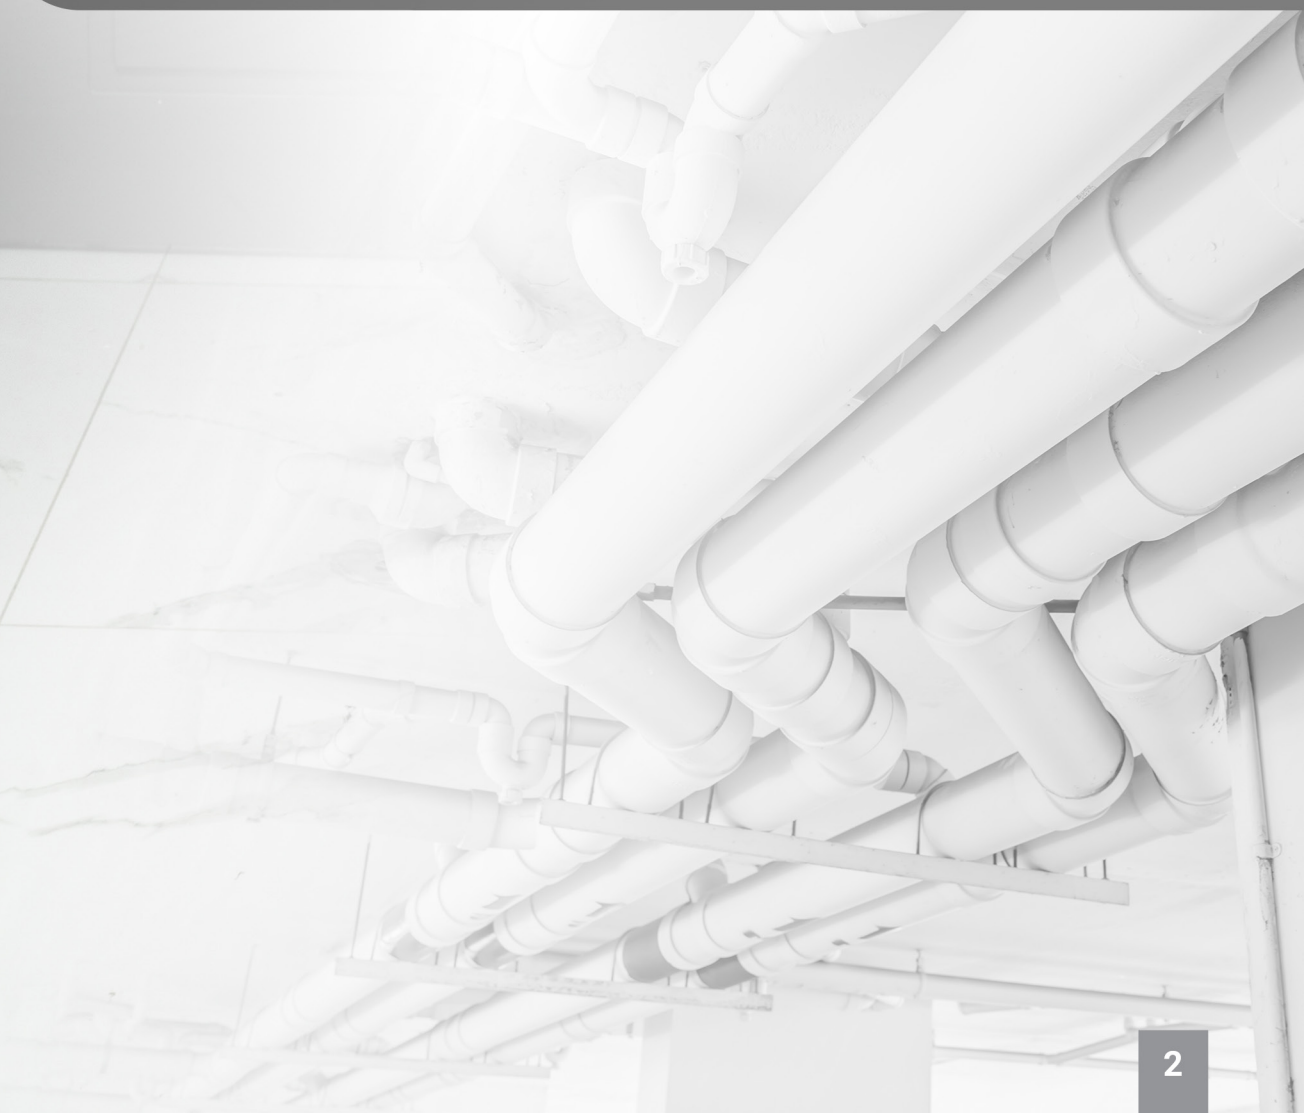

Many smart solutions are designed to eliminate the risks of house damage and improve safety. We know that fires can be disastrous, but water damage is a far more common risk. TIS offers a smart device that alerts the user of potential water damage so that they can take action quickly.

Our Water Leakage Sensor senses water drops on floors, roofs, duct trays, or anywhere else where a leak might occur. TIS Water Leakage's function is smart and simple; you can connect it to your Wi-Fi, and it will message you directly if it detects any problems.

After a long day at work, it is very annoying to come home and see the kitchen splashed with water. Our sensor detects water leakage signs before it is too late and quickly alerts you when water shows up where it should not; whether you are at home, in the office, or away on vacation, the only thing you need to save your property is your mobile phone.

Trust us, and feel safe leaving the house for as long as you want. The TIS Water Leakage Sensor takes care of your home.
